

Statistics 221H Project Deadlines

January 11, 2005

1 Proposal Due: February 15, 2005

This will be a one page description of your research question, the method of data collection, and a schedule for data collection and paper completion.

2 Rough Draft Due: March 29, 2005

The rough drafts will be graded mostly for statistical content and not for grammar. However, the rough draft should be a completed version of the project. Rough Drafts that are too “rough” will be “roughly” graded.

3 Final Project Due: April 12, 2005

This version should be VERY polished. Each project will be graded on three components: Grammar/Style (30%), Statistical Content (50%), Idea Quality/Flow/Development of Ideas (20%). We are at a University and I think all of you are capable of bringing your writing skills into a new arena.
